Fishing Conservation Policy

The Spey Fisheries Board advocate that Proprietors, Anglers and Ghillies should exercise restraint as a positive contribution towards salmon conservation. In particular the decline of the spring run requires additional conservation effort from all concerned. The Board currently proposes a continued voluntary conservation policy as long as it is exercised by all who fish the Spey and its tributaries. The following guidelines have been developed to assist with this policy

Salmon Conservation Policy

Following the continued success of the Salmon Conservation Policy in 2004, when 68% of salmon and grilse were released, the SFB has decided to maintain the Policy for future seasons. The Policy remains as follows:

1. CATCH & RELEASE

- Until 30th June each angler must release the 1st, 3rd, 5th etc. salmon and grilse caught.
- After 30th June all hen salmon and hen grilse must be released.
- Throughout the season all stale or gravid fish must be released.

- Escaped farm salmon must be retained.

2. METHOD

- Where possible anglers should be encouraged to fish with a fly.
- All hooks should be pinched or barbless.
- Where spinning is allowed only one set of barbless hooks may be used on a lure.
- Spinning only allowed in full spate conditions.

3. FISHING EFFORT

- Where possible the numbers of hours and rods fished should be limited.

Sea Trout Conservation Policy

FINNOCK: Release all fish of 10 oz. / 25 cm / 10 " or less.

SEA TROUT: Release all fish of 3 lb. / 50 cm / 20 " or more.

BAG LIMIT: 2 sea trout or finnock of takeable size per calendar day.

All sea trout caught after 1st August to be released

UNSEASONABLE FISH: Release all unseasonable fish (smolts, stale fish, kelts, over-wintered finnock).

Fishing on

Glenlivet Estate

A Guide to the Fishing Beats on the River Avon and River Livet

2010

**THE CROWN
ESTATE**

Fishing on the Glenlivet Estate

The Rivers Avon (pronounced A'an) and Livet are major tributaries of the renowned River Spey and they enjoy a significant reputation for the quality of the salmon and sea trout fishing that can be enjoyed along their reaches.

This leaflet is a guide to the fishing beats on both the River Avon and the River Livet within the Glenlivet Estate. Where fishing beats border (on opposite sides of the bank) or are shared with other neighbouring estates, details of these beats are also given. The different stretches are listed below with a brief description of their fishing, boundaries and contact numbers. A free full colour map leaflet of the Glenlivet Estate is available locally and this shows all the place-names mentioned in this leaflet. This can be obtained from the Estate Office and Information Centre in Tomintoul (open all year) or from the Tomintoul Tourist Information Centre (open Easter – end October). Visitors may find this map useful for locating car parks and other estate facilities. For further information please contact Glenlivet Estate Office on 01479 870070.

The fishing rights on the Glenlivet Estate are leased by The Crown Estate to a local hotel, the Estate's sporting tenant and to community fishing associations and groups. Anyone wanting to fish on the Rivers Avon or Livet must first obtain a permit from the respective leaseholder and these permits restrict fishing to the leaseholder's beat only. Some of the leaseholders have specific restrictions on their individual beats (times and numbers of rods etc.) and these are all explained on their permits. The beat held by the Estate sporting tenant (Kylnadrochit Lodge) is generally only available to their respective residents/guests although non-residents may be welcome to fish at certain times subject to availability. Permits for fishing the community waters are generally more easily available to visitors. Where 2008 permit costs are not yet known, 2007 prices are given as a guideline only and noted (2007) accordingly. Please use the contact numbers given for each beat if you wish to obtain more information.

SEASONS

The traditional fishing seasons for salmon and sea trout on local rivers are:
